

**Noise Monitoring Data-Monthly Summary**

|                            |   |
|----------------------------|---|
| <b>Month and Year:</b>     | Jun-22  |
| <b>Project:</b>            | Central Station Main Works  |
| <b>EPL Licence Number:</b> | 21148   |
| <b>EPL Web link:</b>       | <a href="https://centralstationmetro.com/documents/">https://centralstationmetro.com/documents/</a> |

**Specific EPL Monitoring Condition:** M7.1- Noise Monitoring

| <b>Monitoring Location:</b> | <b>Number of Monitoring Events during the Month</b> | <b>Attended/Continuous Monitoring</b> | <b>Event Based Monitoring? (Y/N)</b> | <b>Measured Parameter: LAeq15mins (dB)</b>                                     | <b>Predicted Parameter: LAeq15mins (dB)</b>  | <b>Comment</b>  |
|-----------------------------|---|---------------------------------------|--------------------------------------|--|--|---|
| Chalmers St                 | 10 night<br>10 evening                              | Continuous                            | Yes                                  | Night:<br>Max night works (OOHW) noise recorded was 68db throughout the month. | Predicted Parameter = 70dB during night and evening OOHW on the suburban platforms throughout the month. | Night OOH<br>Works predominantly consisted of excavating final escalator shafts under Platform 16-19, tiling within Central Walk, assembling lifts, and installing services, finishes and new escalators under and within hoarded work zones on Platforms 16-23. All at source noise mitigation and required additional mitigation measures were in place throughout the month of June. |

**Attended:** Operator attended measure at either the façade of sensitive receiver, internal dwelling of a sensitive receiver or at a location of interest, typically in anticipation of an event.

**Continuous:** Real time noise data recorded in 15min intervals, 24/7 and represents the noise levels at the facade of sensitive receivers.

**Event:** A LAeq15min period of either attended monitoring or a period of interest reviewed from the continuous data. The period is typically selected to monitor works as the works occur, or to validate predictions of planned works, or in response to a complaint, or due to an unexplained elevated LAeq15min period in the continuous data noise trace.
